MONROE TOWNSHIP LIBRARY

How to
Create
Your Own
T-Shirt

- Before you start, please see the Children's Desk and make an appointment to press your image.

- Purchase T-Shirt and transfer paper separately. (Transfer paper comes in light or dark depending on the color of your shirt.)

1. Allow heat press to warm up... all the way to 360 F!

2. Place the image face down on fabric.

3. Place vinyl cover over image.

4. Pull down handle, until it locks.

This will start the automated countdown— usually seven seconds is enough time to transfer an image. When seven seconds are up, release handle.

5. Peel off vinyl covering slowly and with caution...fabric may still be hot!

Congratulations! You have made your very own T-shirt!
